Full-Stack Software Engineer | Python, React, Next.js, Django, PostgreSQL

Full-stack software engineer with experience building and supporting web applications, backend services, automated test suites, and cloud-based deployments. Skilled in React, Next.js, Django, Python, and PostgreSQL, with hands-on experience in distributed systems, API testing, Docker, and Kubernetes. Collaborative team member with Agile experience delivering practical solutions for both internal platforms and client-facing applications.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL

Frontend: React, Next.js, HTML, CSS, Tailwind

Backend: Django, FastAPI, Flask, PostgreSQL, MySQL, REST APIs

Cloud / DevOps / Tools: Kubernetes, Docker, Ansible, GitHub, Jira, Postman, Figma, Stripe, Clerk, OpenAI API, Vercel, Render

EXPERIENCE

Software Engineer Intern | DataRemote, Miami, FL

08/2025 – Present

- Contributed to the WebBackend session manager, supporting device management workflows and delivering real-time data to the UI through WebSockets.
- Fixed UI bugs in the React application, improving usability and overall frontend reliability.
- Developed and expanded a Python-based API test suite, increasing coverage across multiple endpoints in DEV, QAT, and STG.
- Improved test reliability and structure to catch regressions earlier and produce more consistent cross-environment results.
- Collaborated in an Agile/Scrum team using Jira, participating in sprint planning, standups, and two-week sprint cycles.
- Built a strong understanding of how the UI, API, engine, push notification services, and supporting infrastructure interact in a distributed system.
- Supported deployments using Ansible, Docker, and Kubernetes across non-production environments in collaboration with IT.
- Troubleshooted backend logging, containerized services, and environment-specific configuration issues across multiple systems.

Freelance Web Developer | RestWeb Dev, Miami, FL

11/2024 – Present

- Build small business websites and web applications using Next.js, React, Tailwind CSS.
- Design and implement responsive, user-focused interfaces based on client requirements and Figma mockups.
- Develop and maintain client-facing features, content updates, contact flows, and performance-focused frontend experiences.
- Partner directly with clients to translate business needs into practical web solutions that improve online presence and usability.

PROJECTS

BuddhaBasha Jewelry Store – Miami, FL

Next.js, Django, Supabase, Stripe, Clerk, Cloudinary

- Built a full-stack e-commerce platform with a Next.js frontend and Django REST backend.
- Integrated Supabase for database management, Clerk for auth, Stripe for payments, and Cloudinary for product image handling.
- Implemented order confirmation emails and state management for dynamic cart/checkout experience.

Lee Construction Website – Miami, FL

Next.js, Figma, Vercel, Nodemailer, Cloudinary, Redis (Upstash)

- Designed client site based on Figma mockups and deployed with Vercel for fast performance.
- Built an admin panel for managing projects, with add/update/delete and drag-to-reorder features.
- Used Nodemailer for contact form email delivery, Redis (Upstash) for project image position data, and Cloudinary for optimized image storage.

EDUCATION

Florida International University, Miami, FL – Bachelor's in Computer Science

12/2024
